- a recording medium drive unit having loaded therein a recording medium that is a data product having recorded therein map data, readable by one of a computer and a map data processing apparatus, comprising:

- map data including map-related information related to a map, wherein:

the map-related information includes a compilation of a plurality of information elements

the map-related information being updateable in units of the individual information elements at

the map data processing apparatus;

the map-related information includes management information used to manage the map-related information, which is also updated when the map-related information is updated in units of the individual information elements; and

roads are each indicated as a link string having a plurality of continuous links, with nodes representing points on the roads and each link representing a road portion connecting two adjacent nodes; and

the information elements each correspond to information related to a link string and the map-related information is updated in units of link strings, wherein a plurality of levels each corresponding to one of a plurality of scaling factors of the map are defined;  
a level corresponding to a scaling factor with a smaller value that renders the map as a wider area map is designated as a higher-order level; a plurality of sets of map-related information are provided each in correspondence to one of the plurality of levels; and
